PROFILE SUMMARY

Programmer with experience since 2017 in developing web, Android, and internal company systems. Experienced in feature development, backend integration, application maintenance, and deployment to production environments. Familiar with version control, Docker, and cloud server configuration on Google Cloud Platform. Known for a logical, responsible work approach and a focus on ensuring applications run stably according to business needs.

WORK EXPERIENCE

PT. Tempo Inti Media Tbk **May 2019 - Present**
IT Staff / Programmer
Palmerah, Jakarta

- Developed a location-based Android attendance application to help HR monitor employee attendance from valid location points.
- Developed a Laravel-based financial system to support billing, accounts receivable, cash flow, general ledger, and internal reporting dashboards.
- Prepared application deployment to Google Cloud Platform, including cloud server configuration, production environment setup, application services, and system stability checks.
- Maintained and improved internal company applications such as Tempo Book Store, Inventory, and Barter to keep them stable for daily use.

AEON Credit Service Indonesia **Oct 2018 - Apr 2019**
IT Staff / Programmer
Setia Budi, Jakarta

- Maintained an internal web application based on Java Struts to support stable company operations.
- Built a customer loan application data maintenance system to simplify checking and updating customer data.
- Developed the Aeon Fast Android application to support internal operational needs.
- Built backend image management and core system integration so Android application data could connect with the main system.
- Developed a company data retrieval core system and data verification features with Dukcapil.

PT. easySoft Indonesia **Oct 2017 - Jul 2018**
Product Solution / Programmer
Tebet, Jakarta

- Built API services to connect company e-commerce application requirements.
- Maintained an Android application based on Ionic Cordova to ensure the app continued running properly.
- Developed an internal web chat application with a WhatsApp-like concept for company application needs.
